Acknowledgments

Many individuals worked diligently to make this report possible. K. Jane Coulter's leadership, support and vision for a national database on higher education in agriculture and natural resources is paramount to the project's success.

The USDA/CSREES/SERD, Office of Higher Education Programs provides support and structure for FAEIS.

Efforts from the Panel of Experts Representatives - Arley Larson (AASCARR), Samuel Curl (AHS), Don DeHayes (NAPFSC), Michelle Harvey (SAF), Elizabeth Noel (1890) and John White (NASULGC/ACOP/APS) - provide guidance and counsel for development of survey documents, detailed reports and future directions for FAEIS. As advocates for FAEIS, they encourage association members to report data accurately and in a timely manner. The success of these overall efforts relies on their commitment.

Special thanks are due to the administrators and individuals at each institution who carefully and accurately provide information for this report. Data integrity depend upon their diligence and determination in completing survey instruments.

Kerry Litzenberg's direction and ongoing commitment to the FAEIS project make development and integration of new FAEIS information possible. The daily commitment of the FAEIS staff, Sheri Stebenne, Megan McIntire, Rong Hu, Lesley Parnell and Leslie Watson, maintain the integrity of the database and continue to direct and generate information for user communities.

Food and Agricultural Education Information System

The Food and Agricultural Education Information System (FAEIS) offers information on a broad range of higher education statistics related to the food and agricultural sciences (Agriculture, Forestry, Natural Resources, Home Economics, Veterinary Medicine, and closely allied fields). The purpose of FAEIS is to provide empirical information for use in planning and coordinating efforts directed towards supporting higher education in the food, agricultural and natural resource sciences. FAEIS presents national data from professional associations, a number of government agencies (e.g. Department of Education, National Science Foundation, Department of Labor, other Federal agencies), and other national databases. A comprehensive unit, FAEIS offers an accessible resource for faculty, higher education administrators and industry professionals to strengthen higher education programs in the food, agricultural and natural resource sciences.

Foreword

This summary of faculty in Agriculture, Renewable Natural Resources and Forestry programs provides a comprehensive report available by special request for the American Association of State Colleges of Agriculture and Renewable Resources (AASCARR), the National Association of State Universities and Land Grant Colleges/ Academic Committee on Organization and Policy/Academic Programs Section (NASULGC/ACOP/APS), the National Association of Professional Forestry Schools and Colleges (NAPFSC), and the Society of American Foresters (SAF). Please contact the FAEIS office for more information.

These data will be used by the academic community (university and experiment station administrators and personnel), the USDA, congressional staff, media, libraries and industry. These data and other information related to Family and Consumer Sciences can be obtained through several methods. First, the annual reports provide annual summary information. Second, ad hoc information requests can provide more detailed information requiring additional analysis or special qualifiers. Third, FAEIS ON-LINE, the electronic delivery component of FAEIS is designed to disseminate summary information representing the full spectrum of the FAEIS database via the INTERNET. For more information about FAEIS ON-LINE, contact the FAEIS office at (979) 845-5068.

National Summary

INTRODUCTION

This report of Faculty in Agriculture, Renewable Natural Resources and Forestry for Academic Year 2000/2001 employs data from several sources to describe the national population of Faculty employed for Academic Year 2000/2001 and New Faculty Hired in Academic Year 1999/2000 and the Total Faculty and Graduate Assistant Full-Time Equivalents (FTEs) for 2000.

There were 149 institutions of agriculture, renewable natural resources and forestry surveyed. A list of responding and non-responding institutions is included in Appendix B. If your institution was not included in this year's report, we hope you will choose to participate next year.

Information for Current Resident Instruction Faculty employed for Academic Year 2000/2001 illustrates 100 out of 149 institutions surveyed. The New Faculty Hired in Academic Year 1999/2000 information in the national summary section of this report represents 101 out of 149 institutions surveyed. Sixty seven (67) of those 101 reported hiring new faculty. A large portion of the summarized information in this report is presented by academic area or academic specialization. Appendix A is a list of the Academic Specializations in Agriculture, Renewable Natural Resources and Forestry and details the 13 Academic Areas and the Academic Specializations grouped within each area. The academic specializations used in the surveys and reports are a subset of programs defined in the U.S. Department of Education's Classification of Instructional Programs (CIPs).

For those tables incorporating data by National Association of State Universities and Land-Grant Colleges (NASULGC) region, Appendix C contains a regional map including a list of states within each region. A copy of the Academic Year 2000/2001 Survey of Faculty in Agriculture, Renewable Natural Resources and Forestry is available in Appendix E.
